Watermaster solutions to

SHALLOW WATER PROBLEMS

www.watermaster.fi

A photograph of a flooded street in an urban area. The water is murky brown and reaches up to the knees of people wading through it. In the foreground, three shirtless men are wading. In the middle ground, a person on a red motorcycle is riding through the water. To the right, a white sedan is partially submerged. In the background, there are utility poles with many power lines, a white van, and a multi-story blue and white building under a cloudy sky.

PREVENT FLOODS

**CLEAN
URBAN CANALS**

**REMOVE
INVASIVE VEGETATION**

A wide-angle photograph of a narrow canal in a densely populated urban area. The canal is filled with water and has a boat in the foreground. The buildings on both sides are multi-story and appear to be in various states of repair or disrepair. The sky is overcast. The text "KEEP WATERWAYS OPERATIONAL" is overlaid in large white letters in the center of the image.

**KEEP WATERWAYS
OPERATIONAL**

The solution is:
